

Web Service Method: Add a New Attribute Property to a Resource

Description

Use this API call to add a new attribute property to a resource.

URL: `/PoolParty/api/editor/{project}/addAttribute`

Supported Methods

POST

Content-Type

application/json

Request Parameters

Parameter	Comment	Type	Required
editor	The editor's URI.	IRI JSON representation of an IRI object.	true

IRI Type Object

Attribute	Type	Comment
uri	String	The string value of the URI. URIs must contain a colon ':' and must not contain any whitespaces.

Example IRI

```
{
  "uri" : "https://semantic-web.com/api/uri#5233"
}
```

Request Attributes

Attribute	Type	Comment
context	String	URI of the mutable graph in which the source exist.
predicate	String	URI of attribute property
subject	String	URI of source
type	String	The data type of the value that should be added. LITERAL, BOOLEAN, DATE, URI, INTEGER, LONG, FLOAT, DATETIME
value	CustomValue	Attribute value that should be added.

Example

```
{
  "predicate" : "some predicate",
  "subject" : "https://semantic-web.com/api/subject#32540",
  "context" : "some context",
  "type" : "https://semantic-web.com/api/type#10948",
  "value" : {
    "language" : "en-us",
    "label" : "some label"
  }
}
```

Response

Content-Type

text/plain

Status: 200- OK
