

PoolParty Frontend Configuration

The [PoolParty Frontend](#) is divided into two main parts:

The PoolParty Browser

Here you find the **Wiki** and **SPARQL** endpoint.

The PoolParty Linked Data Frontend

Allows to publish thesauri according to the [linked data principles](#) defined by W3C.

You have to execute the [main configuration](#) for the PoolParty Frontend in the system configuration.

The layout of the [PoolParty Browser](#) and the behavior as well as the layout of the [PoolParty Linked Data Frontend](#) you have to configure separately.
