

Semantic Integrator Features

This section and its child pages provide information on features that are exclusively available for the PoolParty Semantic Integrator software bundle.

- [The PoolParty GraphSearch - Overview](#)
 - [PoolParty GraphSearch Use Cases](#) — This section contains a list of the most common use cases for the PoolParty GraphSearch interface.
 - [How to Set Up Search Types in GraphSearch](#) — This section contains a short overview on how to easily configure GraphSearch, using so-called Search Spaces, using existing thesauri and custom schemes maintained in PoolParty Thesaurus Server.
 - [How to Access PoolParty's GraphSearch Interface](#) — This section contains a short guide on how to access the GraphSearch interface in PoolParty.
 - [How to Access PoolParty's GraphSearch Admin Dashboard](#) — Find out how to access the GraphSearch interface in PoolParty in this section.
 - [Create a Search Space](#) — This section provides a concise guide on how to create a Search Space in PoolParty's GraphSearch Admin Dashboard.
 - [Configure an Existing Search Space](#) — After you have created a Search Space, you then can configure some of its options in the Configuration section.
- [PoolParty UnifiedViews - Overview](#)
 - [UnifiedViews User Guide](#)
 - [Unified Views - Data Processing Units \(DPUs\)](#)
